THE PROBLEMS THAT LED TO THE CREATION OF OUR PROJECT:

Lack of trust : Many platforms don't provide verified information about sellers, increasing the risk of fraud or low-quality purchases.

Difficult search process : Unorganized catalogs and inconvenient filters make it hard to find the right cars or parts

Limited access : Traditional dealerships and offline markets often have a limited selection or higher prices, making it difficult to compare options

Communication issues : Delays and misunderstandings between buyers and sellers disrupt the purchasing process.

HOW WE CAN SOLVE THIS “PROBLEM”?

Trust : We verify sellers and provide detailed product information to ensure transparency and reliability.

User-friendly search : With an intuitive interface and advanced filters, users can quickly find what they need, saving time and effort.

Affordable pricing : By connecting buyers directly with sellers, we eliminate unnecessary markups and offer cost-effective solutions.

Efficient communication : Built-in messaging tools streamline communication between buyers and sellers, reducing misunderstandings.

Arman Myrzakenaurov

"Недавно приобрел автомобиль через эту компанию, и остался очень доволен сервисом! Менеджеры оперативно ответили на все мои вопросы (сперва пришло оставить заявку, однако сделали крайне удобно, через Телеграм-бот), помогли выбрать подходящую модель и организовали доставку прямо до Алматы. Автомобиль полностью соответствует описанию, процесс покупки был простым и прозрачным. **Отдельно хочу отметить сайт** — он удобный, с современным дизайном и отлично продуманной навигацией, что делает поиск автомобиля максимально комфортным. Большое спасибо за профессионализм и качественную работу! **Определенно рекомендую.**"

METHODS / TECHNOLOGIES

- 
- 1) **HTML, CSS and JavaScript** for a user-friendly and visually appealing interface.
 - 2) **Design** : We developed a prototype in Figma to make the website intuitive and user-friendly. Each design step was improved based on user feedback.
 - 3) **Development** : We followed the Agile methodology, breaking the project into stages (sprints). This allowed us to progress step by step and enhance the website throughout the process.

CHALLENGES

Designing the Layout

The Figma design was challenging, but after a few iterations and team discussions, we created a layout that met our vision.

Writing the Code

Developing the code was tough, with issues around functionality and stability. But through teamwork and testing, we overcame them.

Ensuring Smooth Functionality

We had to ensure the site ran smoothly, which involved thorough testing and optimizing the code to eliminate any bugs.

IMPACT: POTENTIAL IMPACT AND FUTURE SCOPE

- **Market Expansion**

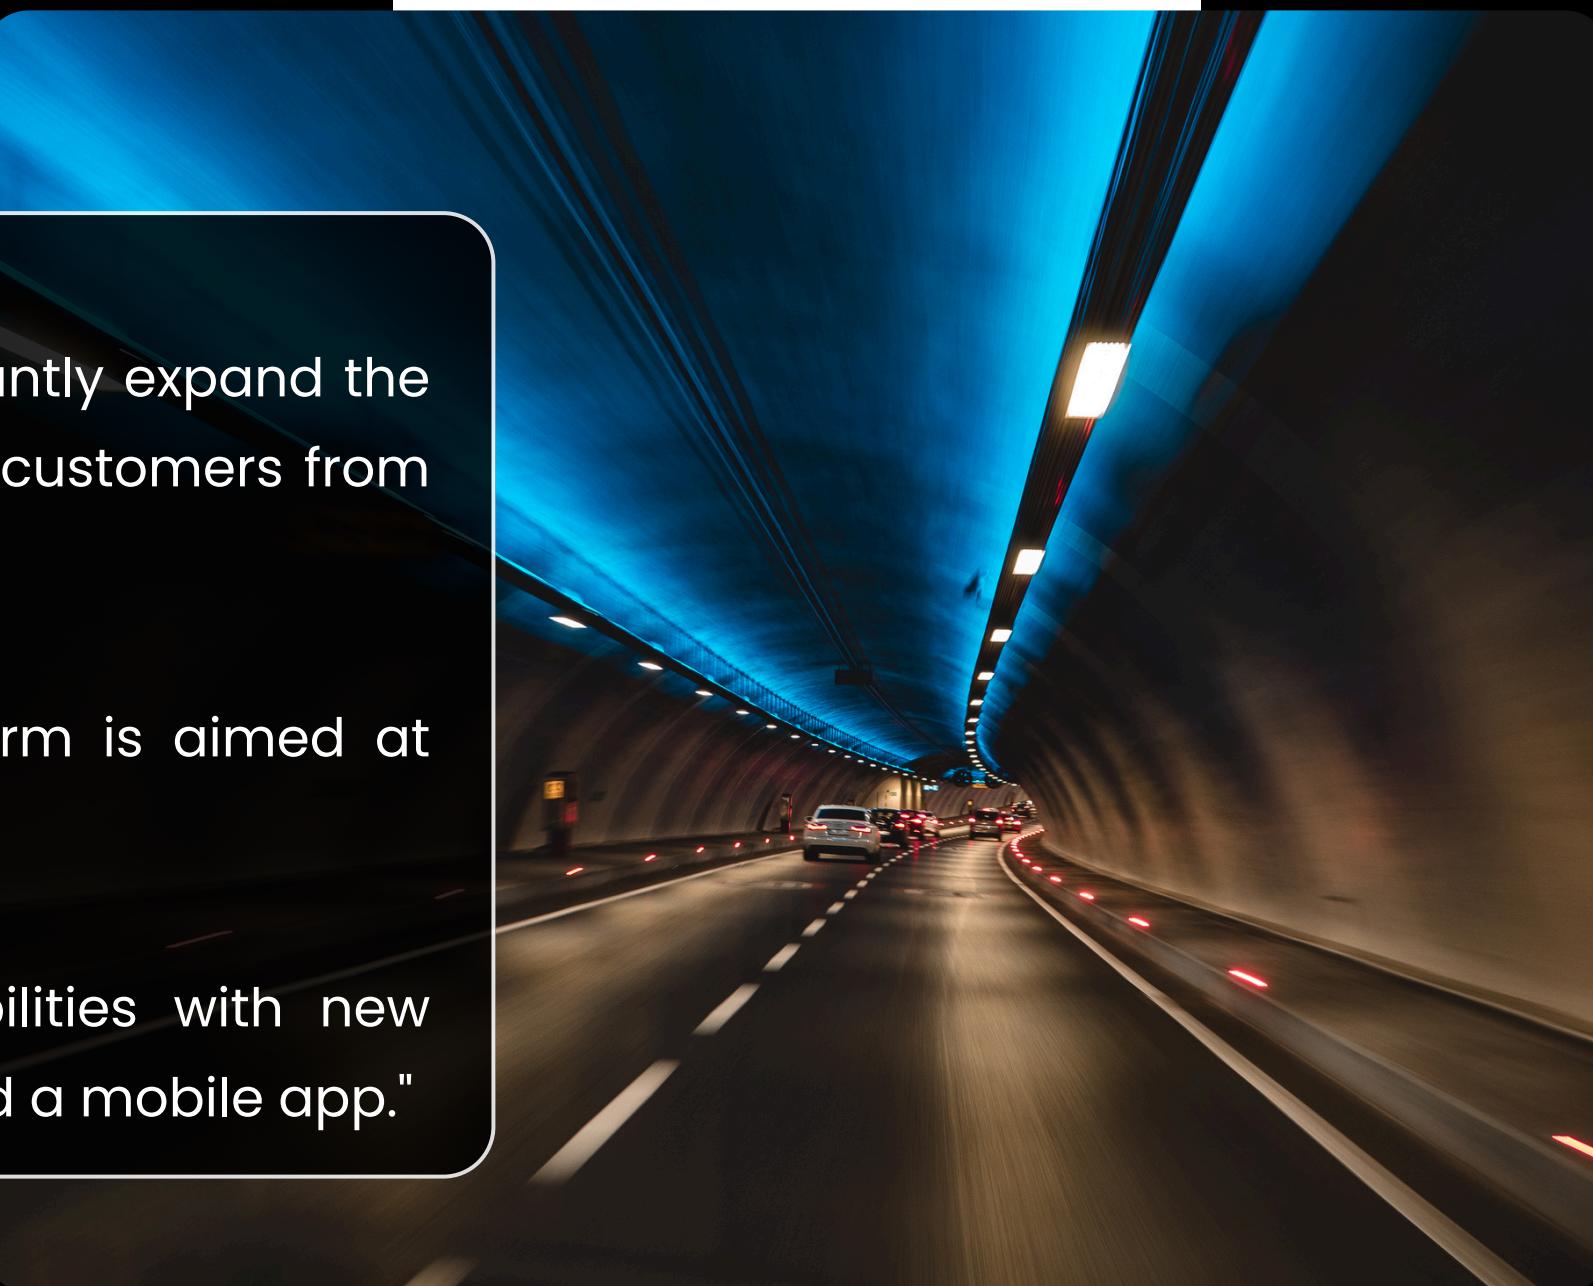

"The Emirates Auto Line platform has the potential to significantly expand the reach of businesses in Dubai, allowing them to connect with customers from around the world."

- **Enhanced User Experience**

"Our focus on creating an intuitive and user-friendly platform is aimed at improving the overall customer experience."

- **Future Innovation**

"Looking ahead, we plan to expand the platform's capabilities with new features like advanced search filters, AI recommendations, and a mobile app."

CONCLUSION

Emirates Auto Line is a successful project that addresses key challenges in the automotive and spare parts industry while opening new opportunities for businesses. We've overcome technical difficulties to create a user-friendly platform, and moving forward, we will continue to innovate, expand, and enhance the platform to stay ahead of industry trends and meet the evolving needs of our customers.

THANK YOU

FOR YOUR ATTENTION!!!
